Projects CASE STUDIES

- **Simple CI/CD Pipeline Using GIT, JENKINS & Tomcat**

Description:

We created EC2 instance for the Jenkins and tomcat. We configured both tomcat and Jenkins. Using the git repository, we fetched the html file and deployed it in Jenkins's server using IPV4 address.

- **Ansible configurations in AWS**

Description:

We have created Two instances for server and clients. We connected both ansibleserver and client and worked on it.

- **CI/CD through Containers (Docker)**

Description:

Here we created a instance for docker and installed the docker and then deployedthe container using the Jenkins.
